Case Study

OWL.GAMES partnered with Polydoge for its beta launch in August. PolyDoge team provided 100 trillion ($50k worth) $POLYDOGE as bankroll. $POLYDOGE **Price Increased** by 16% within 5 days, and the bankroll grow up to 109 trillion.
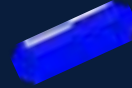

Partnership

There are Two ways to work with OWL.GAMES!

We can simply list your token on our website and do some joint marketing.

We can provide integration solutions that would work for projects who want to have their 'own' casino on the project's website.

1. We can do **Customized Theme** for your site and you can simply **CNAME** a **Subdomain** to our game portal. With this option, you can get:

a.   Personalized theme
b.   Personalized token list

2. You can simply **iframe** our universal game portal: **portal.owl.games**

What do we need from You

- The Listing and Integration is **FREE**!

- We only need a **Bankroll** of $25k worth of your native token. We will do **Profit Share** by each month end. Please note the native tokens will only be used to serve as game capital for your community, who play using your native token. Those token will be refunded if you choose to delist.

- **Joint Marketing**

Referral

If you are listed with us, you can also refer other projects to us.

We will give extra **2% rebate of profits** in their native tokens to you!
